

Radical Chess Audit Report

Radical Chess is a 2D and 3D futuristic play-to-earn (P2E) chess game like no other. It takes the game of chess to the next level with unique and exciting gameplay. The 3D version is called Radical Chess Humanoid. This game features human characters as the chess pieces. They all have unique attributes and skills. You can watch the demo here. The 2D version is the classic chess game like most chess platforms out there but we have very competitive leader boards that would encourage and incentivize active users on the platform.

Notable Information

- Contract had already been deployed onto the mainnet before the audit.
- Contract Owner cannot stop or pause transactions after enable trading.
- Contract Owner cannot transfer tokens from specific address.
