The only minor issues found are:

- Eliminate render-blocking resourcesEfficiently encode images. Resources are blocking the first paint of your page. Consider delivering critical JS/CSS inline and deferring all non-critical JS/styles

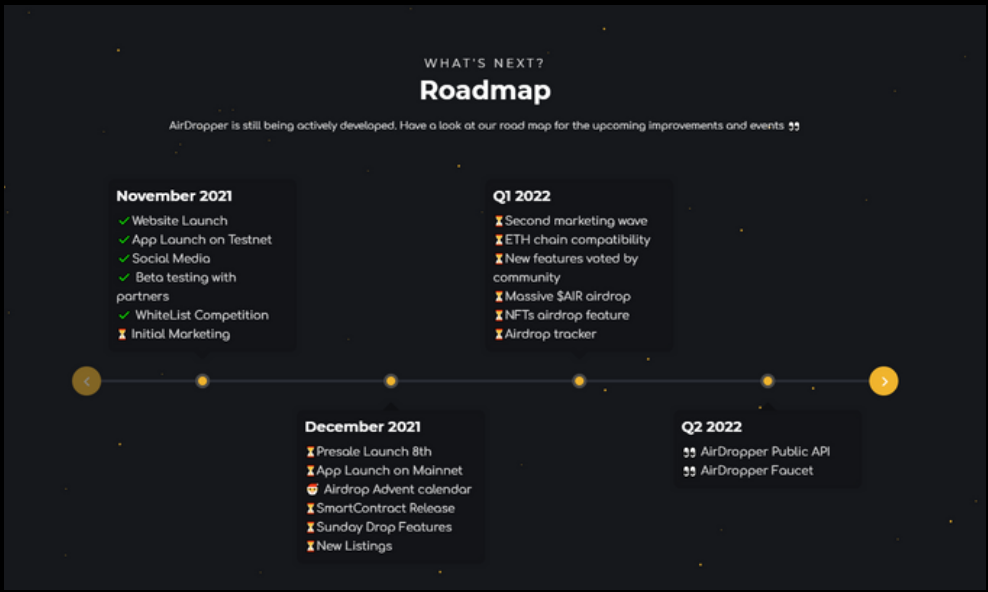
# Roadmap



Roadmap was found on the website and is displayed above. All milestones are on track so far and they are heading to the next phase of their plan.

AIR team is now focused on successfully launching their token and listing to popular tracking websites like CoinmarketCap and Coingecko. Among their next milestones is to integrate with ETH network. Being a community driven project they have plans to develop features voted by the holders.

# Team & Whitepaper

Team was not found on the website.

However the team already passed KYC with Pinksale so their identities are fully shared and saved to Pinksale's database, in case of crime or theft Pinksale will be able to release their identities to the public.

Whitepaper was found on the website.

Airdropper wants to be a platform to facilitate Aidrops to the crowd. There will be a launcher feature for project owners and a dashboard screen for the users looking to participate. Finally the team will host Sunday Airdrop events, where they will be buying a token upvoted from the community and airdropping it to the crowd.

# Contract & Tech

- Contract code is published and verified on BSCAN
- Contract owner can not increase fees more than a reasonable percent
- No malicious or prevent-selling mechanism found

# Award

## Our Award system

- 0-49 score points award you with Bronze Badge - high risk.
- 50-89 score points award you with Silver Badge - medium/low risk.
- 90-100 score points award you with Gold Badge - low risk.

## Your Score

AIR is a low risk project, with a small and growing community. The smart contract analysis showed no warnings. There is no malicious function that the team can abuse to manipulate fees and trades as there are limitations to what the Owner can change. The team was not found or mentioned anywhere but they have passed KYC with PinkSale. That means that their private information is stored and will be released in case of fraud/theft. The project's idea and utility is very interesting and it will solve a real problem.
