- Best Practices
- Accessibility
- SEO ranking

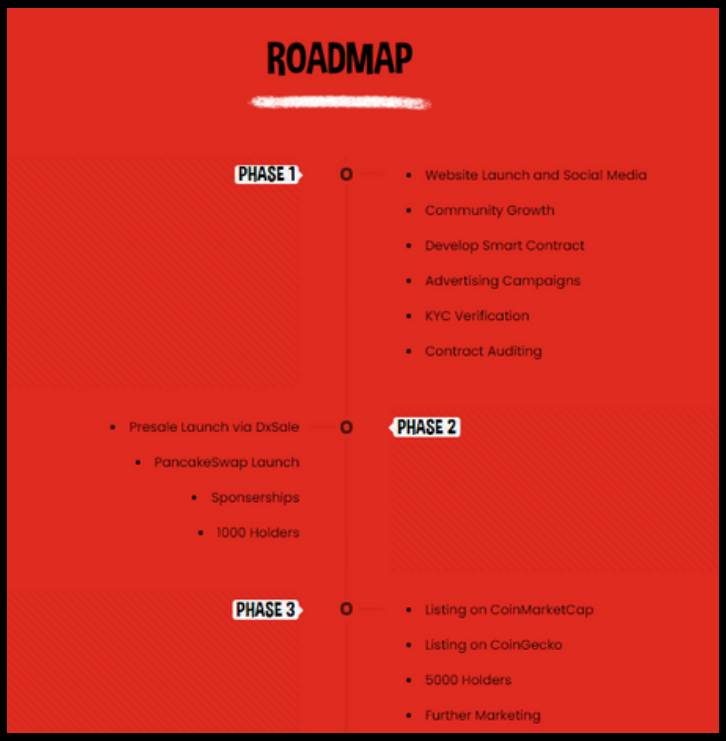

The only minor issues found are:

- Serve images in next-gen formats. Image formats like WebP and AVIF often provide better compression than PNG or JPEG, which means faster downloads and less data consumption.
- Properly size images. Serve images that are appropriately-sized to save mobile data and improve load time.

Your Score

TOPFLOKI is a very low risk project, with a friendly and growing community. The smart contract analysis showed no warnings. There is no malicious function that the team can abuse to manipulate fees and trades as there are limitations to what the Owner can change. (Up to 25% max total fees). The team is not doxxed but they verified their information to Nanuqe using KYC (a verified DxSale KYC partner). That means that their private information is stored and will be released in case of fraud/theft. The project is a meme token with a very noble charity purpose. Focusing on Marketing will grow the project and raise awareness to new investors.
