Website Report

- Performance
- Best Practices
- Accessibility
- SEO ranking

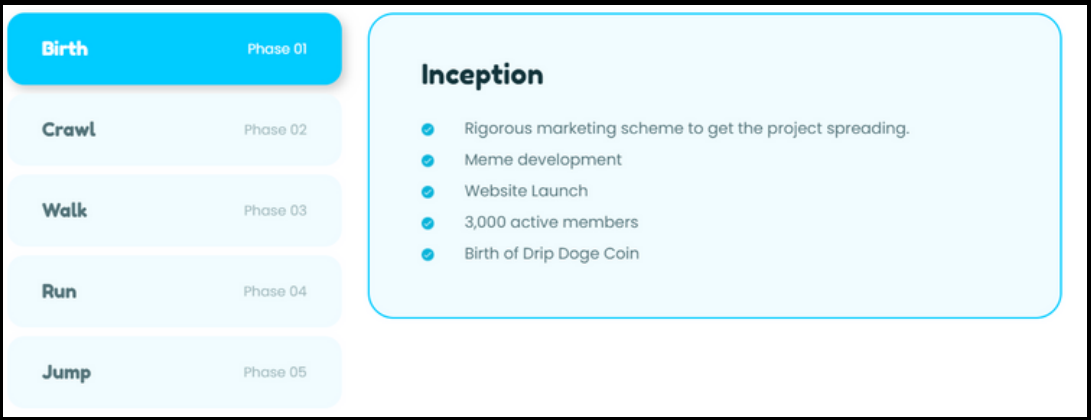

The only minor issues found are:

- Image formats like WebP and AVIF often provide better compression than PNG or JPEG, which means faster downloads and less data consumption.
- Properly size images. Serve images that are appropriately-sized to save cellular data and improve load time.

COINSCOPE

Roadmap

Roadmap was found on the website and is displayed above. All milestones are on track so far and they are heading to the next phase of their plan.

The project aims to release among others an NFT marketplace, a merh store and yield Farms to reward holders.

The goals are realistic and the project is very interesting.

Team & Whitepaper

Team was not found on the website.

This is not a blocker as many project owners will prefer to hide their identiies and decide to come forward later.

WhitePaper was found on the website.

The DRIPDOGE whitepaper explains how the ecosystem of the project works, and the tokenomics reflections that are in effect (7% holders, 5% LP , 3% marketing).

As a genuine memecoin they also created their own telegram stickers.

- 90-100 score points award you with Gold Badge - low risk.

Your Score

DRIPDOGE is a low risk project, with a friendly community and a very interesting roadmap. The smart contract analysis showed no warnings, and the contract is a safemoon-alike clone with reflection tokenomics. The whitepaper focuses on explaining the ecosystem and the next features that will be implemented. (Yield farms, NFT marketplace) No information was found for the team, they should try to be more transparent with the community to gain trust and confidence (a potential AMA could help).
