Website Report

- Performance
- Best Practices
- Accessibility
- SEO ranking

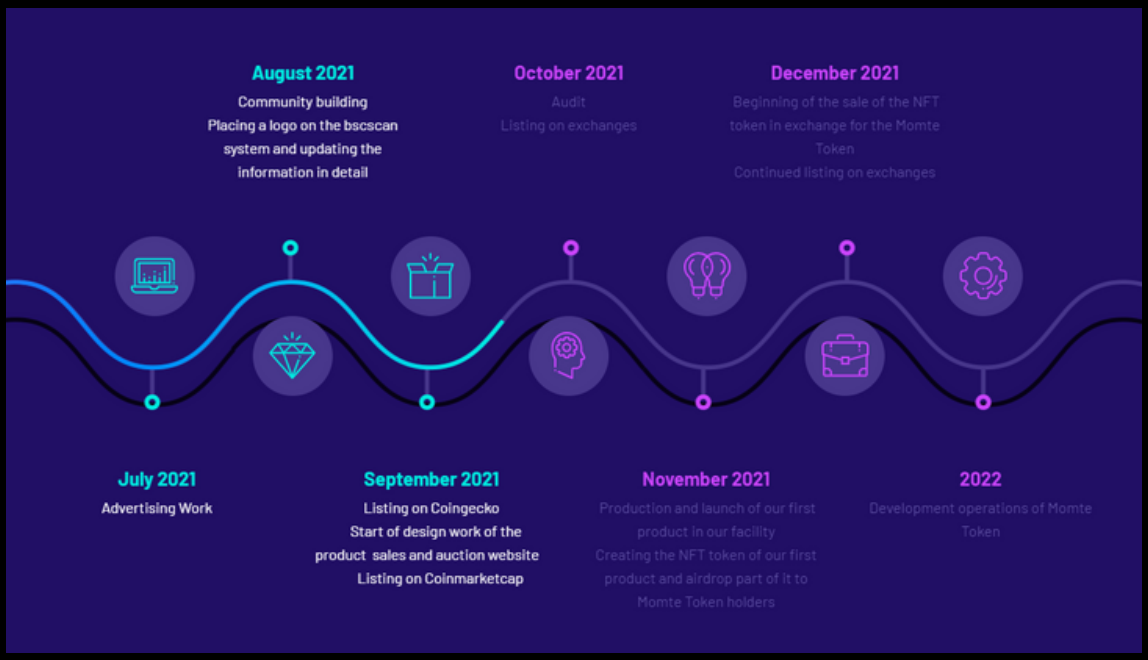

The only minor issues found are:

- Serve images that are appropriately-sized to save cellular data and improve load time.
- Image formats like JPEG 2000, JPEG XR, and WebP often provide better compression than PNG or JPEG, which means faster downloads and less data consumption
- Keep the server response time for the main document short because all other requests depend on it.

Roadmap

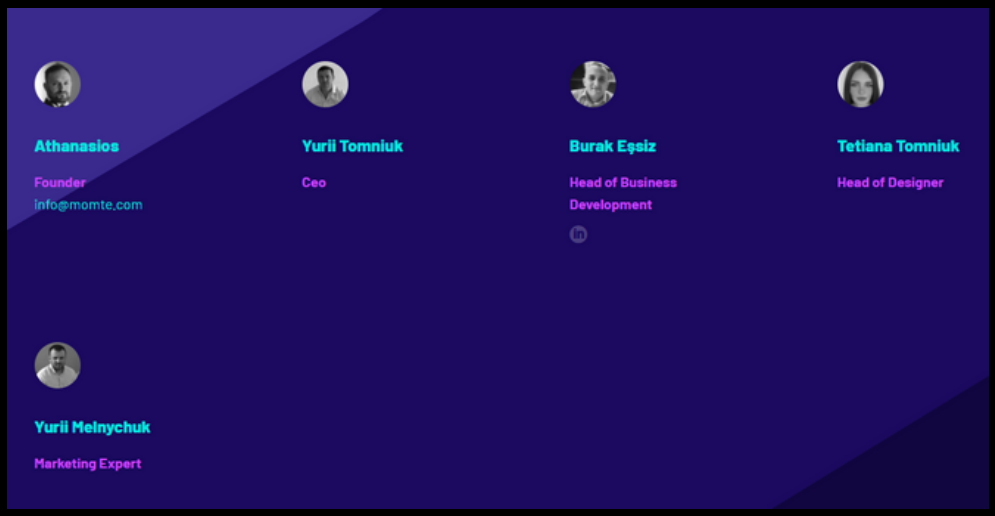

Roadmap was found on the website and is displayed above. All milestones are on track so far and they are heading to the next phase of their plan.

Potential dangers for remaining Roadmap targets

- CoinmarketCap requires high trading volume
- CoinGecko requires high trading volume

Team Analysis

Team section was found on the website and is displayed above.

Some social links are attached to a few profiles, redirecting to what seems to be real profiles - they have a lot of followers and activity on Linkedin.

This is generally a good sign as most projects will keep their team behind the scenes. The team behind MOMTE seem transparent.

Contract & Tech

- Contract code is published and verified on BSCAN
- No Major warning/error found
- Contract has Burn/deflation mechanism

Your Score

MOMTE is a low risk project, with a small and friendly community. The smart contract analysis showed no major warnings/errors. The roadmap is very promising, and the team has been hitting their roadmap milestones with success. A lot of trading volume and an increase in holders will be required for the next steps and the healthy growth of this project.
