GALABET AUDIT

BEP-20 TOKEN

COINSCOPE

Prepared by: Coinscope team

For Contract Address : 0x6d6521283CD3Fd0188Fe0408e700A5790a0f6C61

DISCLAIMER

Coinscope team does not guarantees that a project will not remove liquidity, sell off team supply, or any other exit scam strategy.

The information provided on this document by auditing the respective project is only for general information and should NOT be used as a reason to invest in any independent project.

Our goal is to run as many diagnostics we can with the information we have and is publicly available.

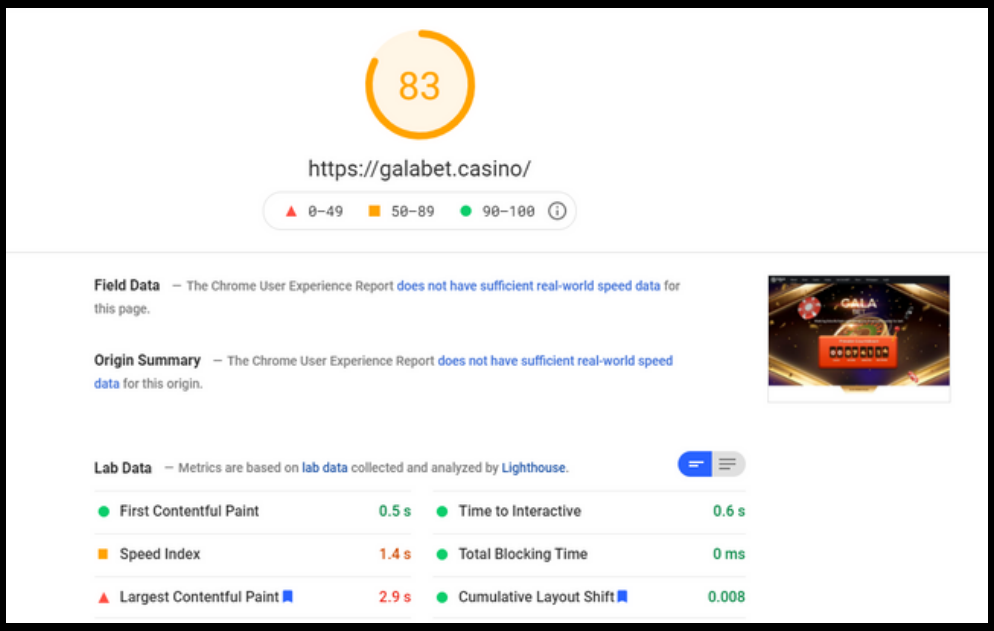

In the end of this audit we will objectively score this project based on the table of contents listed on https://www.coinscope.co/audit

Coinscope team under no circumstances will take any bribe or payment for manipulating the results of this audit. We will score and award a security Gem that will stay on this project's information for ever on our website.

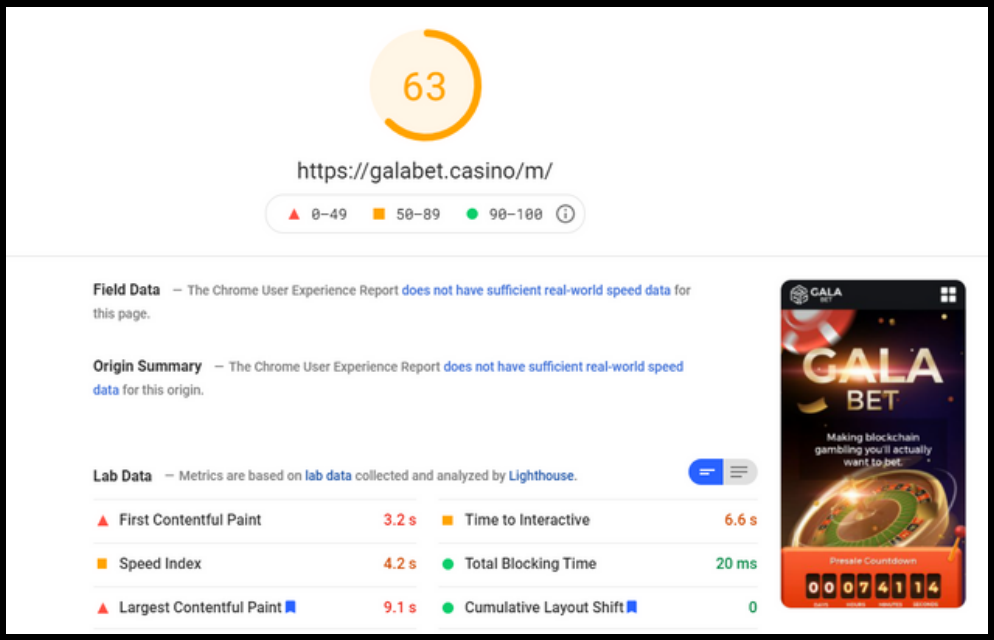

COINSCOPE

Website Report

- Performance
- Best Practices
- Accessibility
- SEO ranking

The only minor issues found are:

- Image formats like WebP and AVIF often provide better compression than PNG or JPEG, which means faster downloads and less data consumption.
- Properly size images. Serve images that are appropriately-sized to save cellular data and improve load time.

COINSCOPE

Roadmap

Roadmap was found on the website and is displayed above. All milestones are on track so far and they are heading to the next phase of their plan.

The project aims to relase a GALABET NFT store and it's first online casino games (Poker and Crash Gambling)

The goals are realistic and the project is very interesting.

COINSCOPE

Team & Whitepaper

Team was not found on the website.

This is not a blocker as many project owners will prefer to hide their identiies and decide to come forward later.

WhitePaper was found on the website.

The GALABET whitepaper thoroughly explains the offline and online variations. There is a deep analysis of the gambling games that are applicable to the user. They introduced the GALABET NODE ecosystem and the different levels of NFT.

Contract & Tech

Contract code is published and verified on BSCAN

Contract contains a proxy function

```
abstract contract Proxy {
    /**
     * @dev Fallback function.
     * Implemented entirely in `_fallback`.
     */
    fallback() external payable {
        _fallback();
    }

    /**
     * @dev Receive function.
     * Implemented entirely in `_fallback`.
     */
    receive() external payable {
        _fallback();
    }

    /**
     * @return The Address of the implementation.
     */
    function _implementation() internal view virtual returns (address);

    /**
     * @dev Delegates execution to an implementation contract.
     * This is a low level function that doesn't return to its internal call site.
     * It will return to the external caller whatever the implementation returns.
     * @param implementation Address to delegate.
     */
    function _delegate(address implementation) internal {
        assembly {
            // Copy msg.data. We take full control of memory in this inline assembly
            // block because it will not return to Solidity code. We overwrite the
            // Solidity scratch pad at memory position 0.
            calldatacopy(0, 0, calldatasize())

            // Call the implementation.
            // out and outsize are 0 because we don't know the size yet.
            let result := delegatecall(gas(), implementation, 0, calldatasize(), 0, 0)

            // Copy the returned data.
            returndatacopy(0, 0, returndatasize())

            switch result
                // delegatecall returns 0 on error.
                case 0 {
                    revert(0, returndatasize())
```

COINSCOPE

Contract Results

- Integer Underflow
- Integer Overflow
- Parity Multisig Bug
- Callstack Depth Attack
- Transaction-Ordering Dependency
- Timestamp Dependency
- Re-Entrancy

Award

Our Award system

- 0-49 score points award you with Bronze Badge - high risk.
- 50-89 score points award you with Silver Badge - medium/low risk.
- 90-100 score points award you with Gold Badge - low risk.

Your Score

GALABET is a low risk project, with a friendly community and a very interesting roadmap. The smart contract analysis showed no warnings, but there is a proxy function. Some tokens have implemented a proxy pattern to allow future upgrades. On the other hand, token admin can change the logic anytime. The whitepaper is very well documented, and the team should try to be more transparent with the community to gain trust and confidence (a potential AMA could help).
