SLD AUDIT

BEP-20 TOKEN

COINSCOPE

Prepared by: Coinscope team
For Contract Address : 0x24519018513a71f83951336b990098de978f5bad

DISCLAIMER

Coinscope team does not guarantees that a project will not remove liquidity, sell off team supply, or any other exit scam strategy.

The information provided on this document by auditing the respective project is only for general information and should NOT be used as a reason to invest in any independent project.

Our goal is to run as many diagnostics we can with the information we have and is publicly available.

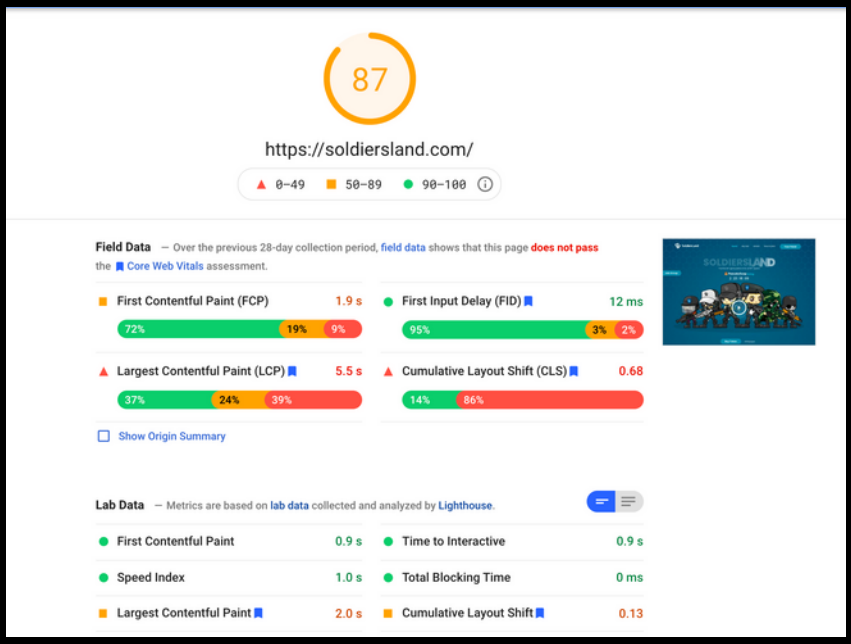

In the end of this audit we will objectively score this project based on the table of contents listed on https://www.coinscope.co/audit

Coinscope team under no circumstances will take any bribe or payment for manipulating the results of this audit. We will score and award a security Gem that will stay on this project's information for ever on our website.

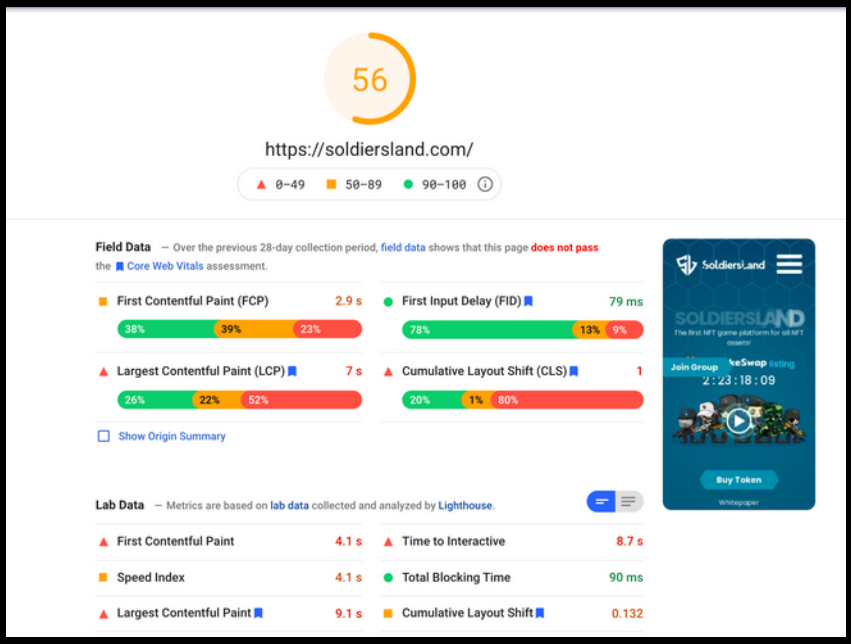

COINSCOPE

Website Report

- Performance
- Best Practices
- Accessibility
- SEO ranking

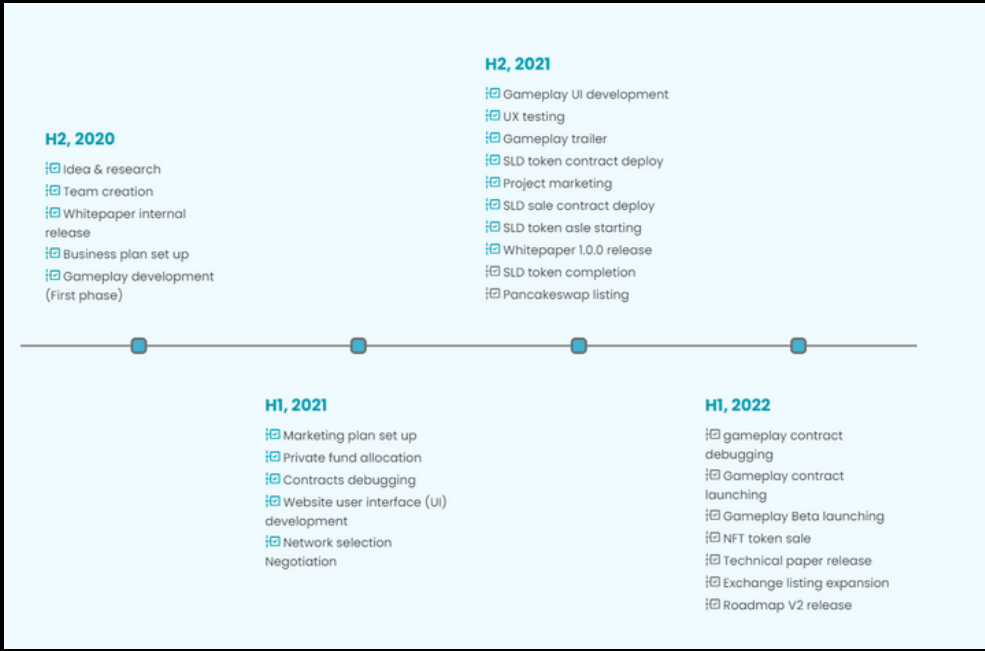

The only minor issues found are:

- Reduce unused JavaScript. Reduce unused JavaScript and defer loading scripts until they are required to decrease bytes consumed by network activity.
- Eliminate render-blocking resources. Resources are blocking the first paint of your page. Consider delivering critical JS/CSS inline and deferring all non-critical JS/styles.

COINSCOPE

Roadmap

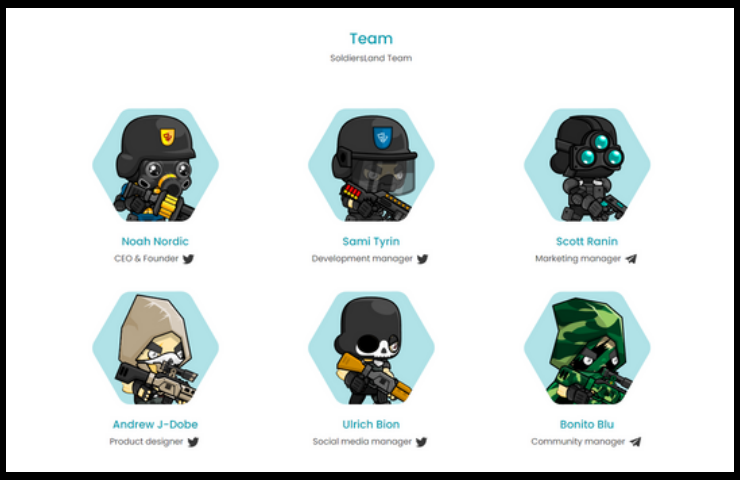

Roadmap was found on the website and is displayed above. All milestones are on track so far and they are heading to the next phase of their plan.

The project aims to succesfuly launch their SLD token on Pancakeswap, and then focus on Gameplay contracts. NFT Token and Exchange listing expansion is also planned as next milestones.

COINSCOPE

Team & Whitepaper

Team was found on the website.

The team has indicated how many people are behind the project, but there are no social profiles linking to any real account. This is not a blocker as many projects prefer to stay anonymous and protect their identities.

WhitePaper was found on the website.

SoldiersLand WhitePaper focuses on explaining the gameplay and the rules of their decentralized game based on the blockchain of the Binance Chain Network. They also present the allocation fund and the game fee percentages.

Contract & Tech

Contract code is published and verified on BSCAN

Contract contains a Burn From address function

```
/**
 * @dev Extension of {ERC20} that allows token holders to destroy both their own
 * tokens and those that they have an allowance for, in a way that can be
 * recognized off-chain (via event analysis).
 */
abstract contract ERC20Burnable is Context, ERC20 {
    /**
     * @dev Destroys `amount` tokens from the caller.
     *
     * See {ERC20-_burn}.
     */
    function burn(uint256 amount) public virtual {
        _burn(_msgSender(), amount);
    }

    /**
     * @dev Destroys `amount` tokens from `account`, deducting from the caller's
     * allowance.
     *
     * See {ERC20-_burn} and {ERC20-allowance}.
     *
     * Requirements:
     *
     * - the caller must have allowance for ``accounts``'s tokens of at least
     * `amount`.
     */
    function burnFrom(address account, uint256 amount) public virtual {
        uint256 currentAllowance = allowance(account, _msgSender());
        require(currentAllowance >= amount, "ERC20: burn amount exceeds allowance");
        unchecked {
            _approve(account, _msgSender(), currentAllowance - amount);
        }
        _burn(account, amount);
    }
}
```

Award

Our Award system

- 0-49 score points award you with Bronze Badge - high risk.
- 50-89 score points award you with Silver Badge - medium/low risk.
- 90-100 score points award you with Gold Badge - low risk.

Your Score

SLD is a med/low risk project, with a small community and a very interesting roadmap. The smart contract analysis showed no errors or warnings but there is a burnFrom address function. This function could be used to burn high holder's tokens. Renouncing ownership would normally reduce the risk of exploiting the function, but there is no renounce ownership function in the contract. Doxxing the team or hosting an AMA is highly advised to provide confidence and trust to the community.
