Website Report

- Performance
- Best Practices
- Accessibility
- SEO ranking

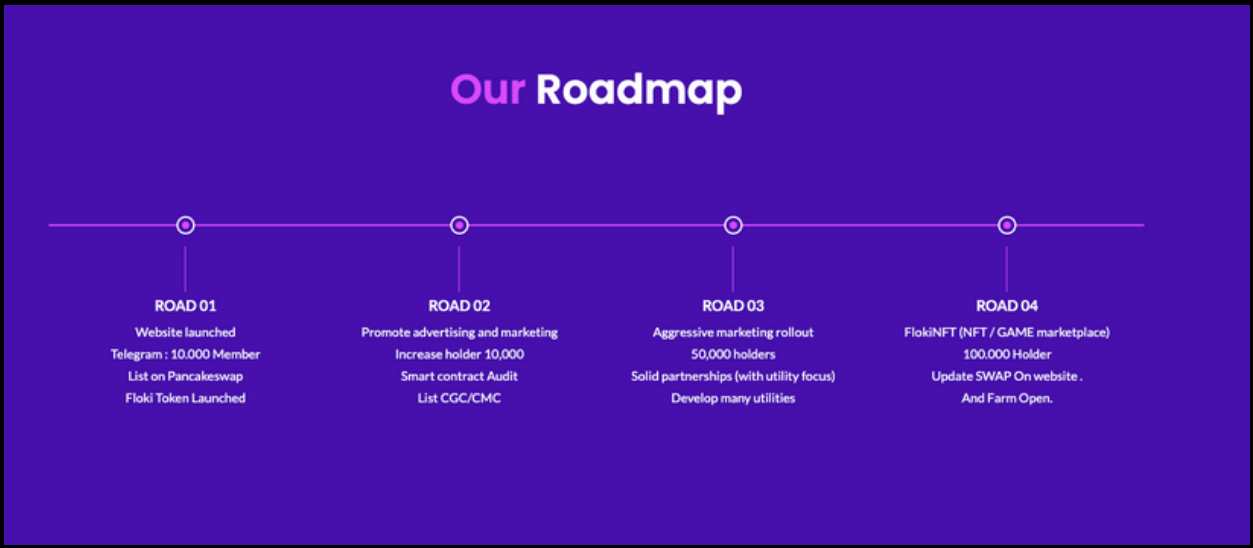

The only minor issues found are:

- Image formats like WebP and AVIF often provide better compression than PNG or JPEG, which means faster downloads and less data consumption.
- Properly size images. Serve images that are appropriately-sized to save cellular data and improve load time.

Roadmap

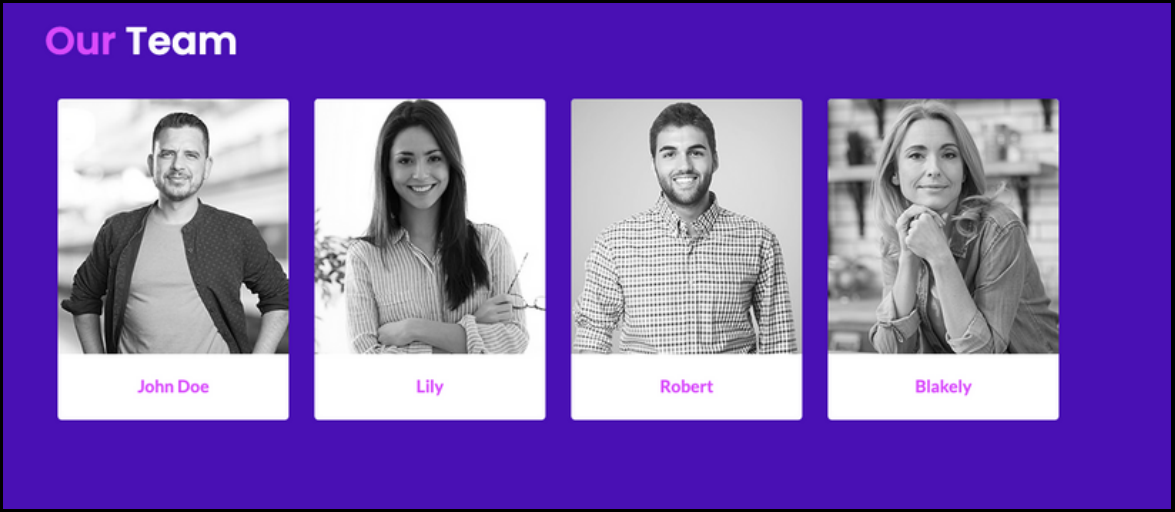

Roadmap was found on the website and is displayed above. All milestones are on track so far and they are heading to the next phase of their plan.

Potential dangers for remaining Roadmap targets

- CoinmarketCap requires high trading volume and number of holders
- CoinGecko requires high trading volume and number of holders

Team analysis

Team was found on the website and is shown above.

The profiles do not have social links attached so no information can be extracted about them at the time being.

This is not a blocker as many project owners choose to come forward later with an AMA or with links to their real profiles (Linkedin would be useful).

Award

Our Award system

- 0-49 score points award you with Bronze Badge - high risk.
- 50-89 score points award you with Silver Badge - medium/low risk.
- 90-100 score points award you with Gold Badge - low risk.

Your Score

FLOKI is a medium/low risk project, with a friendly community and a very interesting roadmap. The smart contract analysis showed no serious warnings. The contract is a Safemoon-alike clone with reflection Tokenomics. The project needs a marketing boost to organically grow. A lot more holders and Daily trading volume will be required for the next steps.
