# Contract Analysis

● Critical
 ● Medium
 ● Minor
 ● Pass

| Severity | Code | Description                                                                                                       |
|----------|------|-------------------------------------------------------------------------------------------------------------------|
| ●        | ST   | Contract Owner is not able to stop or pause transactions                                                          |
| ●        | OCTD | Contract Owner is not able to transfer tokens from specific address                                               |
| ●        | OTUT | Owner Transfer User's Tokens                                                                                      |
| ●        | ELFM | Contract Owner is not able to increase fees more than a reasonable percent (25%)                                  |
| ●        | ULTW | Contract Owner is not able to increase the amount of liquidity taken by dev wallet more than a reasonable percent |
| ●        | MT   | Contract Owner is not able to mint new tokens                                                                     |
| ●        | BT   | Contract Owner is not able to burn tokens from specific wallet                                                    |
| ●        | BC   | Contract Owner is not able to blacklist wallets from selling                                                      |

# Contract Diagnostics

● Critical    ● Medium    ● Minor

| Severity | Code | Description                                |
|----------|------|--------------------------------------------|
| ●        | L01  | Public Function could be Declared External |
| ●        | L05  | Unused State Variable                      |
| ●        | L04  | Conformance to Solidity Naming Conventions |
| ●        | L09  | Dead Code Elimination                      |
| ●        | L07  | Missing Events Arithmetic                  |

## L01 - Public Function could be Declared External

**Criticality**

minor

**Location**

contract.sol#L2894,L2882,L2874 and 40 more

### Description

Public functions that are never called by the contract should be declared external to save gas.

```
isExcludedFromDividends  
dividendTokenBalanceOf  
withdrawableDividendOf  
...
```

### Recommendation

Use the external attribute for functions never called from the contract

## L05 - Unused State Variable

**Criticality**

minor

**Location**

contract.sol#L1774,L1843

### Description

There are segments that contains unused state variable.

```
__gap  
MAX_INT256
```

### Recommendation

Remove unused state variables.

## L04 - Conformance to Solidity Naming Conventions

**Criticality**

minor

**Location**

contract.sol#L2601,L2372,L2086 and 21 more

### Description

Solidity defines a naming convention that should be followed. Rule exceptions:

- Allow constant variable name/symbol/decimals to be lowercase.
- Allow \_ at the beginning of the mixed\_case match for private variables and unused parameters.

```
_marketingWalletAddress  
_account  
magnitude  
...
```

### Recommendation

Follow the Solidity naming convention.

<https://docs.soliditylang.org/en/v0.4.25/style-guide.html#naming-conventions>

## L09 - Dead Code Elimination

|                    |                                            |
|--------------------|--------------------------------------------|
| <b>Criticality</b> | minor                                      |
| <b>Location</b>    | contract.sol#L1848,L1860,L1889 and 18 more |

### Description

Functions that are not used in the contract, and make the code's size bigger.

```
mul
div
abs
...
```

### Recommendation

Remove unused functions.

## L07 - Missing Events Arithmetic

**Criticality**

minor

**Location**

contract.sol#L2798,L2792,L2786 and 1 more

### Description

Detected missing events for critical arithmetic parameters. There are functions that have no event emitted, so it is difficult to track off-chain changes.

```
marketingFee = value
liquidityFee = value
totalFees = tokenRewardsFee.add(liquidityFee).add(marketingFee)
...
```

### Recommendation

Emit an event for critical parameter changes.

# Contract Functions

| Contract              | Type           | Bases                           |            |           |
