# Contract Analysis

● Critical   
 ● Medium   
 ● Minor   
 ● Pass

| Severity                            | Code | Description                                                                                                       |
|-------------------------------------|------|-------------------------------------------------------------------------------------------------------------------|
| <span style="color: blue;">●</span> | ST   | Contract Owner is not able to stop or pause transactions                                                          |
| <span style="color: blue;">●</span> | OCTD | Contract Owner is not able to transfer tokens from specific address                                               |
| <span style="color: blue;">●</span> | OTUT | Owner Transfer User's Tokens                                                                                      |
| <span style="color: blue;">●</span> | ELFM | Contract Owner is not able to increase fees more than a reasonable percent (25%)                                  |
| <span style="color: blue;">●</span> | ULTW | Contract Owner is not able to increase the amount of liquidity taken by dev wallet more than a reasonable percent |
| <span style="color: blue;">●</span> | MT   | Contract Owner is not able to mint new tokens                                                                     |
| <span style="color: blue;">●</span> | BT   | Contract Owner is not able to burn tokens from specific wallet                                                    |
| <span style="color: blue;">●</span> | BC   | Contract Owner is not able to blacklist wallets from selling                                                      |

# Contract Diagnostics

The contract is a pure implementation of the ERC20 interface. Since there is no custom implementation, there are no remarkable findings.

# Contract Functions

| Contract        | Type              | Bases      |            |           |
|-----------------|-------------------|------------|------------|-----------|
|                 | Function Name     | Visibility | Mutability | Modifiers |
| <b>IERC20</b>   | Interface         |            |            |           |
|                 | totalSupply       | External   |            | -         |
|                 | balanceOf         | External   |            | -         |
|                 | transfer          | External   | ✓          | -         |
|                 | allowance         | External   |            | -         |
|                 | approve           | External   | ✓          | -         |
|                 | transferFrom      | External   | ✓          | -         |

The domain has been created about 1 month before the creation of the audit. It will expire in almost 2 years.

There is no public billing information, the creator is protected by the privacy settings.

## Summary

The Smart Contract analysis reported no compiler error or critical issues. In fact there are not any functions that can be abused by the owner to interrupt the user's transactions. The contract is a pure implementation of the ERC20 interface.
