Audit Updates

Initial Audit	3rd January 2022
Corrected	

Contract Diagnostics

● Critical ● Medium ● Minor

Severity	Code	Description
●	L01	Public Function could be Declared External
●	L03	Redundant Statements
●	L04	Conformance to Solidity Naming Conventions
●	L09	Dead Code Elimination
●	CR	Code Repetition

L01 - Public Function could be Declared External

Criticality

minor

Location

@openzeppelin/contracts/token/ERC721/ERC721.sol#L69,L62,L54 and 30 more

Description

Public functions that are never called by the contract should be declared external to save gas.

```
renounceAdmin  
removeAdmin  
addAdmin  
...
```

Recommendation

Use the external attribute for functions never called from the contract

L03 - Redundant Statements

Criticality

minor

Location

@openzeppelin/contracts/utils/Context.sol#L21

Description

Detect the usage of redundant statements that have no effect.

Context

Recommendation

Remove redundant statements if they congest code but offer no value.

L04 - Conformance to Solidity Naming Conventions

Criticality

minor

Location

@openzeppelin/contracts/token/ERC721/ERC721.sol#L13,L246,L239 and 40 more

Description

Solidity defines a naming convention that should be followed. Rule exceptions:

- Allow constant variable name/symbol/decimals to be lowercase.
- Allow _ at the beginning of the mixed_case match for private variables and unused parameters.

```
    durableMax
    _value
    _nftNo
    ...
```

Recommendation

Follow the Solidity naming convention.

<https://docs.soliditylang.org/en/v0.4.25/style-guide.html#naming-conventions>

L09 - Dead Code Elimination

Criticality

minor

Location

@openzeppelin/contracts/utils/Address.sol#L55,L39,L157 and 15 more

Description

Functions that are not used in the contract, and make the code's size bigger.

```
toHexString  
remove  
length  
...
```

Recommendation

Remove unused functions.

CR - Code Repetition

Criticality

minor

Location

HeroNFT.sol#L44,L60,L85

Description

There are code segments that are repetitive in the contract. Those segments increase the code size of the contract unnecessarily.

```
if (_startNo >= ownerNFTs[_acc].length()){
    _endNo = _startNo;
} else if (_endNo > ownerNFTs[_acc].length()) {
    _endNo = ownerNFTs[_acc].length();
}
```

Recommendation

Create an internal function that contains the code segment and remove it from all the sections.
