Website Report

- Performance
- Best Practices
- Accessibility
- SEO ranking

The only minor issues found are:

- Consider lazy-loading offscreen and hidden images after all critical resources have finished loading to lower time to interactive.
- Serve images that are appropriately-sized to save cellular data and improve load time.
- Image formats like JPEG 2000, JPEG XR, and WebP often provide better compression than PNG or JPEG, which means faster downloads and less data consumption.

Roadmap

Potential dangers for remaining Roadmap targets

- CoinmarketCap requires high trading volume
- CoinGecko requires high trading volume
- 5000 holders is a lot more than the current number of holders (143 at the time that this project is being audited)

Contract & Tech

- ✓ Contract code is published and verified on BSCAN
- ✓ No Major warning/error found
- ✓ Contract has Burn/deflation mechanism

```
function excludeFromReward(address account) public onlyOwner() {  
    require(account != 0x05fF2B0DB69458A0750badebc4f9e13aDd608C7F, 'We can not exclude Pancake router.');
```

On excludeFromReward function, the check about pancake router has the v1 router address

Remmendation:

- Change the router address to be the one from v2 (0x10ED43C718714eb63d5aA57B78B54704E256024E)
- Use double quotes for string literals

Smart Contract Results

- ✓ Integer Underflow
- ✓ Integer Overflow
- ✓ Parity Multisig Bug
- ✓ Callstack Depth Attack
- ✓ Transaction-Ordering Dependency
- ✓ Timestamp Dependency
- ✓ Re-Entrancy

The domain is bought almost 1 month before the analysis of this audit and is set for renew in the next year.

The project is up and running for 2 weeks by the of the audit.

This is generally a good sign as most altcoins will try to exit and sell/dump as soon as they launch.

Your Score

BEZZO is a low risk project, with a small and friendly community. There is room for improvements on the marketing side and the team should spend some time to optimizing the assets in the website, as it is the first thing new investors will look at. The smart contract analysis showed it is a Safemoon clone with a few differentiations on the tokenomics. No Major issues/errors found on the smart contract. A lot of holders and trading volume will be required to reach the next roadmap milestones.
